Microsoft is a monopoly. Today I was searching the web for an alternative graphics program because I can't afford the 500.00 for Photoshop, and I found one that modifies all the standard file formats for far less than adobe's product. When it comes time to upgrade to the new versions of a pc operating system that supports all the hardware in my system, or that I can run any standard suite of applications on I will be forced to buy Microsoft Windows.

Microsoft cannot be allowed to push out the competition.
Microsoft must share its api's.
